371 PATRICIAN WAY

PASADENA

Style: Spanish Colonial Revival

Year of Completion: 1927

Original Building Permit: #5696D, issued by the City of Pasadena on August 23, 1927 for a one-story, nine-room residence. The house, to measure approximately 64 by 70 feet with a maximum height of 19 feet, would have a concrete foundation, wood-frame walls, a tile roof, two chimneys with a total of five flues, and floors of concrete, tile, and wood. A total of 71 light fixtures were purchased from the Wilkinson-Scott Company.

A copy of this permit is attached on page 20.

Cost to Build: \$15,000—a typical cost for a house of this size at the time.

Architect: Webber, Staunton & Spaulding, Los Angeles. The house was designed as Mr. Staunton's personal residence. Please see the attached materials about this design partnership on pages 10 through 17.

Builder: Houghton & Anderson, Los Angeles.

First Owner: William F. Staunton, Jr., a partner in the architectural firm of Webber, Staunton & Spaulding, who shared the house with his wife Mary B. Staunton and their two children. Mr. Staunton had purchased the vacant parcel from the Title Guarantee & Trust Company.

William Field Staunton, Jr., was born on August 25, 1893 in Tombstone, Arizona where his father was a well-known copper-mine manager. The younger Staunton earned a B.A. in architecture from Cornell in 1916. By 1917, he had relocated with his family to Los Angeles where they lived on South Harvard Blvd. During that time he found work as a draftsman with the well-known architect Arthur Kelly. He joined the firm of Webber and Spaulding in 1923.

Mrs. Staunton was born Mary Bates Martin on March 5, 1899 in Berlin, Germany to American nationals. Her brother worked in the American embassy. She was living in Berkeley, California and working as a secretary when she married her husband in February 1926. They would have two children: William F. III (1926-2000) and Mary (born ca. 1930). Mrs. Staunton was active in local groups, including the San Marino Women's Club.

William Staunton, Jr., was a member of the Allied Architects Association and the American Institute of Architects. Following the breakup of Webber, Staunton & Spaulding, he established a private practice at 816 West Fifth Street in downtown Los Angeles. He specialized in residential projects, including a home for Arthur T. MacDonald in Pasadena (1932), the residence of M. L. Gretchell at 1405 South Oakland in Pasadena (1937), and the Dr. C. G. Hartley house on Moraga Drive in Bel-Air (1939). Mr. Staunton was active in the Los Angeles University Club, the Newport Harbor Yacht Club, and the Pacific Beach Club of Santa Monica.

Mr. Staunton sold his Patrician Way home in 1940 and moved elsewhere in Pasadena. Directories identified him at that time as a "draftsman." During World War II, he worked for the Federal Housing Administration and, post-war, took on both design and contracting jobs in the private sector. His entry in *Who's Who in California* is attached on page 6.

William Staunton died in Yucca Valley on November 28, 1977 at age 84. No obituary could be found for him. His wife had pre-deceased him—Mary Staunton passed away in Pasadena on March 6, 1969, age 69. Her brief obituary from the *Pasadena Star-News* is attached on page 7.

Other Building Permits: Just before the permit for the house was issued, in July 1927, the construction of a 67-foot-long reinforced-concrete retaining wall was allowed, costing \$1,000.

In February 1965, fire damage to 400 square feet of the house was repaired at a cost of \$2,000. W. J. Escherich, Jr., of San Marino was the contractor.

Construction of a 3.5-foot-tall wall and gate along the street was permitted in March 1985. The owner would serve as his own contractor for this job, valued at \$1,000.

Electrical service was upgraded to 200 amps in February 2015.

Copies of some of these permits are attached on pages 21 through 23.

(Note: Permits for very minor alterations, such as water heater replacement, are not included. Also not included are permits missing from the file or whose microfilmed or digital copies are indecipherable and not otherwise recorded or described in Assessor's records.)

Assessor's Records: The Pasadena City Assessor first visited the property on January 12, 1928 and recorded a newly-constructed single residence with a concrete foundation, walls of reinforced concrete, a gabled tiled roof, and plain trim. Heat was provided by three fireplaces and a gas furnace. There were thirteen plumbing fixtures. Interior finishes were described as "special."

The Assessor estimated the square footage at 4,971. The house contained two living rooms (one was probably a dining room), four bedrooms, three tiled bathrooms, a pantry, and a kitchen. There were also three basement areas: one at 6 by 44 feet, another at 14 by 20 feet, and a third at 16 by 22 feet. A central patio measured approximately 16 by 20 feet. A garage, measuring approximately 22 by 32 feet, was attached to the house.

The Los Angeles County Assessor currently estimates the square footage of the house at 3,846 with five bedrooms and three bathrooms.

Copies of the City Assessor's building records are attached on pages 24 and 25.

(Note: The Pasadena City Assessor's Office ceased operations in 1974. Their square footage totals often differed from those of the Los Angeles County Assessor's Office, since they frequently included garages, terraces, patios, etc. in their computation. It is advisable to rely on the County Assessor's square footage figures since they are more up-to-date and consistent.)

Other Owners and Residents: The next owners of the property in 1941 were James Horace Kindel and his wife Philippina B. Kindel who shared the house with their sons James H., Jr., and Wallace M. Kindel. The senior Mr. Kindel was the owner of a Dodge automobile dealership located at 294 West Colorado. Mrs. Kindel was recorded as the sole owner of the Patrician Way property after the death of her husband in 1955.

By 1956, Grant P. Holcomb, Jr., a radio and television newscaster, and his wife Jeanne P. Holcomb had become the owners. Living with them were Grant III, Lynne, and Susan, all students. Mr. Holcomb, a native of San Bernardino and a graduate of U.C., Berkeley, began his career in 1941 as a newsman for a radio station in Riverside. He later moved to CBS Radio in San Francisco. He became a newscaster for KNX Radio in Los Angeles in 1951, and the following year went to work for KNXT Television. He served as the station's news director from 1966 to 1971 and was appointed its Washington correspondent in 1973. Mr. Holcomb died at age 60 in 1977. An obituary and tribute published in the *Los Angeles Times* are attached on pages 8 and 9.

Marylou Ingram, a physician and scientist, gained title in April 1972. She was employed at the Huntington Medical Research Institute.

Notes: Catalogs of the Wilkinson-Scott Company, the vendors of the original electrical fixtures, can be found at the Pasadena Public Library.

The Staunton house was featured in the November 1931 issue of *California Arts & Architecture* magazine. The article considered the patio as being its "most interesting feature," as it formed the heart of the house: "brick-paved, bordered by trees and plants, it is ready for manifold uses."

Another feature was the "quaint corner fireplace in the owner's bedroom." A copy of the article can be found on pages 18 and 19.

Significance: The Staunton house is potentially eligible for listing on a local inventory of significant properties due to its association with a known architect as his own home, its good state of preservation, and its contribution to the architectural and historical context of the Patrician Way neighborhood.

Grant Holcomb

Grant Holcomb, Veteran TV Newsman, Dies

Veteran CBS radio and television newsman Grant Holcomb, 60, died of cancer Friday in St. Vincent's Hospital.

Holcomb served as news director of television station KNXT here from 1966 to 1971. He became KNXT's Washington correspondent in 1973.

A native of San Bernardino and a graduate of UC Berkeley, he began his career in 1941 as a newsman on radio station KPRO in Riverside. He joined CBS radio in San Francisco in 1942.

Holcomb replaced Chet Huntley as a news broadcaster at KNX radio in Los Angeles in 1951 and went over to KNXT as a reporter the following year. He had also served as political editor and assistant to the general manager at KNXT.

He leaves his wife, Jeanne; three children, Grant III, Lynn and Susan Hofmans; two brothers, William, mayor of San Bernardino, and Theodore, and a sister, Katherine Dole.

Funeral arrangements were pend-

... but a Fitting Eulogy Enhances Memorial Rites

The following eulogy to Grant Holcomb, a veteran KNXT newsman who died Dec. 16, was delivered by his colleague Bill Stout at a memorial service held last week at All Saints Episcopal Church in Pasadena, the day after his ashes were strewn over Pasadena, where he had lived.

Grant Holcomb belonged much more to the news business than to this formal religious setting where we now honor him.

But regardless of the vast differences between the spiritual and the temporal, in the end we all must answer to the same management. It is in recognition of this simple truth that we have gathered here to say goodby and share a few memories, rather than meeting in some more worldly place of the sort Grant would have been delighted to help us choose.

There is, of course, one great advantage in the choice of this setting: The basic literature, so familiar to everyone, is readily available, and it says just about everything there is to be said. Ecclesiastes, for instance, asks and answers so many questions.

How dieth the wise man? And it says, the same as the fool. That same book reminds us that to every thing there is a season, and a time to every purpose under the heaven. We all know how it goes from there: a time to be born and a time to die . . . a time to weep and a time to laugh . . . a time to mourn and a time to dance.

Grant would surely opt for the dancing. He might even point out that, like a good many other aphorisms in the Old Testament, that bit of wisdom from Ecclesiastes was cribbed from Homer, though he said it a bit differently in the Odyssey: There is a time for many words, and there is also a time for sleep.

Grant might well have pointed out that crib on the part of the compilers of the scriptures because he was, though always using the mildest language, a man of consistent irreverence.

He saw them all without their clothes, in all their comic nakedness: from Earl Warren through the Kennedys, both John and Robert, from Bill Knowland to Nikita Khrushchev—he saw all these and so many more. And he loved every minute of every story, I think, because he was a good reporter. In our business, there can be no higher praise.

Grant was also, of course, a delightful friend. A lover of the rollick and the ribald. A man of courtliness, gentleness and charm. An enthusiast, perhaps, for very few things, but those few are among the most important: good food and good drink, old friends, old loyalties. A gentle man, in the truest sense. A man of honor in a field where gentleness has become a virtue nearly quaint in its rarity.

A dear friend, gone now, and while we may not in the loss of him feel at all like dancing, we must know that neither would he want us to weep.

Robert Browning was just one of many who have talked of death and tried to figure out how to face it. He wrote of the fog in his throat and the mist in his face and said, Let me taste the whole of it . . . bear the brunt (of it) . . . In a minute, pay glad life's arrears of pain, darkness, and cold.

That's one way to see it. Most of us, I'd guess, would rather leave it to Grant, since he's gone on ahead of us, to make arrangements and clear a space and leave a bit of room at the rail. Because if there is any continuum in this grand game, if there is any thread of fairness between here and there, he'll have found a place that's fun and, with luck, we can share some of it with him, sometime. All over again.

WEBBER, STAUNTON & SPAULDING An Architectural Partnership

The partnership of Walter Webber, Sumner Spaulding, and William F. Staunton during the 1920s in Los Angeles, produced a number of buildings that were diverse in both use and style.

There is very little documentation available about the early professional life of Walter I. Webber. Born in August 1864 in Massachusetts, he eventually settled in Pasadena with his wife Maudilee. Some of his independent design works include the Japanese-styled Bernheimer residence in Hollywood and 476 Bradford Street in Pasadena (both 1913), a house at 684 Norwood Drive, Pasadena (1915), and the Stanley Apartments and Livingstone Hotel, which still stand at 86-92 South Los Robles Avenue, Pasadena (1925-27). Webber evidently moved to Los Angeles shortly after 1920, forming a partnership with Sumner M. Spaulding the following year.

Sumner Maurice Spaulding was a native of Ionia, Michigan, born there in June 1892. After attending the University of Michigan for three years, he received a B. A. from M.I.T. in 1916. (Spaulding was to undertake further study in Europe between 1921 and 1926, and in Mexico during the early 1940s.) After military service during World War I, Spaulding became an architectural draftsman in 1920, and secured his license to practice architecture in 1921. Webber, his senior by about eighteen years, probably had a great impact on his first formative years as an architect. Older architects, such as Webber, were well-schooled in the decorative styles of the Beaux Arts philosophy, and the earliest work of this firm reflects that mind-set.

By 1923, Webber & Spaulding had taken on another partner, William Field Staunton, Jr., becoming known as Webber, Staunton & Spaulding. (The architect Everett Radcliffe Harmon also seems to have been associated with the partners around this time.) Staunton was born in August 1893 in Tombstone, Arizona where his father was a well-known copper-mine manager. By 1917, after graduating with a B.A. degree in architecture from Cornell, the younger Staunton had relocated to Los Angeles where he found work as a draftsman for the well-known architect Arthur Kelly before joining Webber & Spaulding.

Webber, Staunton & Spaulding proved to be adept at designing all types of buildings, from theaters to schools, and residences of all sizes. Perhaps one of their most well-known clients was silent-film star Harold Lloyd for whom they designed the massive Beverly Hills home known as "Greenacres." It cost an astounding \$500,000 to build in 1927! William Wrigley must have admired their work as well, for he commissioned the partners to design a number of buildings on Catalina Island which he then owned. Their most famous landmark on the Island is the Casino, designed, according to Gebhard and Winter, in a "strange mixture of Spanish, Moorish and Art Deco Moderne" in 1928.

Among the other documented works of Webber, Staunton & Spaulding:

St. Lawrence Parish School, Los Angeles (1923) Leo Youngworth residence, Baldwin Hills--in a Tuscan style (1923) Malaga Cove Plaza, Palos Verdes—in association with the Olmsted brothers—four such centers were planned, but this was the only one built (1924)

E. W. Murphy residence, Los Angeles (1924)

W. R. Hervey residence, Newport Beach (1924)

Plans for a high school in Avalon, Catalina Island (1924)

Reavis Hughes residence, 1122 Lagunita, Pasadena (1924)

Theater and shop building in Avalon--thought to be the location of the current post office (1924)

Lincoln High School, Los Angeles (1924)

Aubrey Wardman residence, Whittier (ca. 1925)

G. Bury residence, 2304 Hollyridge, Hollywood--winner of a local award from the American Institute of Architects (1925)

P. G. White residence, 4th & June Streets, Los Angeles (1927)

Residence for firm partner William F. Staunton, Jr., and his wife Mary,

371 Patrician Way, Pasadena (1927)

Sigma Tau Fraternity, U.S.C. (1928)

Margaret C. Proctor residence, 526 South Hudson, Los Angeles (1928)

Frary Hall, Pomona College, Claremont (1929)

Y.W.C.A., 435 South Boyle, Los Angeles (1931)

In 1925, the *Pacific Coast Architect* magazine characterized the partnership's work as "restrained, thoughtful, and yet far from being commonplace or stereotyped." They were praised for avoiding the "picturesque and bizarre" that was all the rage in the age of the flapper. Webber and his associates carefully studied all the conditions and requirements of the site and the client and expressed them in a direct and simple structure. Emphasizing proportion, balance, and solidity, their houses still managed a good use of the texture and color of the building materials that were available. The sense of scale, in mass and detail, was consistent throughout. The firm's residential interiors were described as dignified and restful, but were criticized for being a bit lacking in domestic warmth.

Walter Webber appears to have retired in the early 1930s. Upon his death in June 1943, at the age of 78, only a brief burial notice was published in the *Los Angeles Times*.

Sumner Spaulding seems to have left a more lasting impression on his profession, especially when he became independent of the partnership. He became proficient in the design of many types of buildings, including country estates, housing projects, museums, hospitals, schools, and colleges. After World War II, Spaulding formed an association with another architect, John Rex, and a structural engineer C. Gordon De Swarte, both of Los Angeles. Spaulding was associated with John C. Austin in planning the Los Angeles Municipal Airport in 1940-41 and was also chairman of a committee of the American Institute of Architects (A.I.A.) that designed the Los Angeles Civic Center between 1937 and 1943. Other works include the design of the men's campus of Pomona College, a theater and shop building at Claremont (1939), the American National Red Cross Building in Los Angeles (1200 South Vermont, 1939), the school of medicine at the College of Medical Evangelists, and Westchester High School (1952). Spaulding is also remembered for his redevelopment plans for a number of American cities.

However, his interest in residential design continued throughout his career. Among the homes he designed:

Martin Pollard residence, North Hollywood (ca. 1935) Millea residence, Santa Monica (1939) H. S. Anderson residence, Bel-Air (1940) Behrendt residence, Los Angeles (1941) Case Study House #2 (1942) Neff residence, Los Angeles (1947)

Active in his profession, Spaulding was named a Fellow of the A.I.A., serving as president of its Southern California Chapter and chairing its Slum Clearance and Urban Redevelopment Committee. He lectured in architecture at the University of Southern California and at Scripps College and maintained memberships in the International Institute of Los Angeles, the Community Welfare Federation of Los Angeles, the American Society of Planning Officials, the National Housing Conference, and the California Housing and Planning Association (of which he was a board member). He also wrote many articles for professional publications dealing with such subjects as drafting skills and the design of apartment houses, schools, restaurants and other commercial and showroom spaces. He lived in Beverly Hills with his wife Pauline (Snyder) Spaulding (whom he had married in 1918) and their daughter Rosemary.

Obituaries published upon Sumner Spaulding's death in April 1952, at the age of 59, honored him as a "nationally known architect and city planner."

William Staunton, Jr. was a member of the Allied Architects Association and the A.I.A. Following the breakup of Webber, Staunton & Spaulding, he went on to design his own residential projects, including a home for Arthur T. MacDonald in Pasadena (1932), the residence of M. L. Gretchell at 1405 South Oakland in Pasadena (1937), and the Dr. C. G. Hartley house on Moraga Drive in Bel-Air (1939). During the 1940s, local directories identified him as a "draftsman." During World War II, he worked for the Federal Housing Administration and, post-war, took on both design and contracting jobs in the private sector. He died in Yucca Valley in November 1977 at age 84. No obituary could be found for him.

SUMNER SPAULDING DIES AT 59; FELLOW OF A.I.A.

Sumner Spaulding, 59, a Fellow of the American Institute of Architects and former head of the A.I.A.'s Slum Clearance and Urban Redevelopment Committee, died April 10.

Mr. Spaulding, who was a practicing architect in California for 27 years, had been associated since World War II with the firm of Sumner Spaulding, John Rex, architects, C. C. De Swarte, structural engineer, of Los Angeles.

Mr. Spaulding received a B.A. degree at the Massachusetts Institute of Technology in 1916. He studied in Europe from 1921 to 1926.

Mr. Spaulding's early work was largely residential and his interest in house design continued throughout his career (see pages 115–121, this issue). He had done many college buildings, including the designs for the men's campus at Pomona College.

For the last ten years, Mr. Spaulding devoted much time to the field of slum clearance, urban rehabilitation and community planning. He served as chairman of the committee of the Southern California Chapter of the A.I.A. which from 1937 to 1943 was engaged in designing the Los Angeles Civic Center.

Mr. Spaulding's work included the Los Angeles Municipal Airport, with J. C. Austin, the Santa Catalina Island Casino, the School of Medicine at the College of Medical Evangelists, Los Angeles, and the new State Exposition Building, also at Los Angeles.

Mr. Spaulding was a past president of Southern California A.I.A. Chapter.

BREAKFAST ROOM, RESIDENCE OF AUSTIN MCFADDEN

THE WORK OF WEBBER, STAUNTON AND SPAULDING

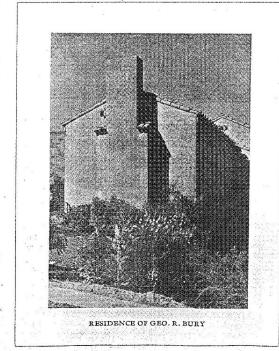

BY HARRIS ALLEN, A. I. A.

N THESE days of jazz and jumble, when the hysteria which is an inevitable aftermath of a great war has not yet subsided, when the natural exuberance of youth runs wild in every direction, it is noteworthy—and refreshing—to find young men

doing work that is restrained, thoughtful, and yet far from being commonplace or stereotyped. Webber, Staunton and Spaulding are three quite young men who appear to be proceeding consistently and harmoniously along the straight and narrow path of architecture, avoiding the temptations which must frequently occur. For clients today are eager for novelty, and the glittering butterfly of the picturesque and bizatre flutters enticingly across the way. It is not always easy to resist succumbing to this fascination, even for some of us who are old and weatherworn travellers.

So far, however, the work of this firm displays a sobriety and a firmness of judgment. Which is surprising and significant. It is not that a picturesque ensemble is not achieved. The is far from being the case. But it is quire

Continued...

evidently not deliberately attempted. What happens is, that conditions, requirements, relationships, proportions, are all carefully studied and valued, and their structural expression worked out in terms of the utmost directness and simplicity—I had almost said, sternness.

They have not hesitated to avail themselves of the recent re-discoveries of the beauty of texture and color, in stucco, tile, accessories; but the main impression their buildings make is one of substance, of suitability and strength. There is no frivolity in their designs, albeit an excellent sense of proportion and balance.

Both the McFadden and the Bury houses, illustrated in this issue, are all but massive in their structural solidity, but are so logical in development that they do not seem clumsy, small as they are. It is interesting to note that the sense of scale is unbroken, in mass or detail.

The San Marino School preserves the same salient features, although the detail of its main entrance is somewhat incoherent and coulhave had more study profitably. As the drawings for the Plaza at Palos Verdes evidently were intended for presenting the scheme and not for final plans, it need only be said that they show a breadth of treatment that should result

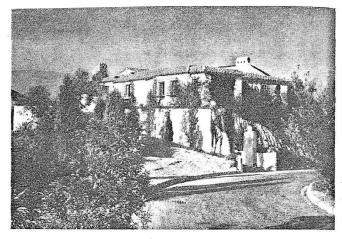

in a very successful group of buildings.

The interior views here shown have similar qualities to the exterior facades. This results in dignity and restfulness, but also in some lack of the domestic feeling that should be present. In fact, there is the suggestion of a country club at its best. It often happens that an architect "arrives" first with his exterior compositions. As this firm grows in experience, their work is sure to become more mellow and rounded—

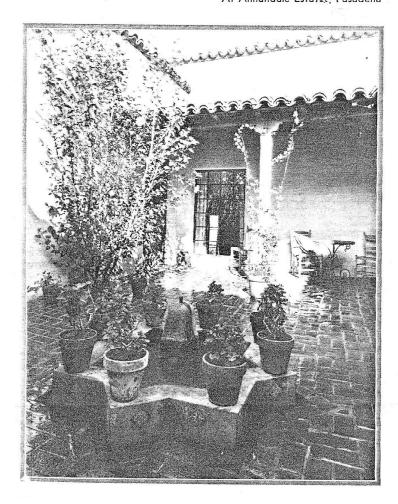

they have the basic essentials.

The family life is well protected from the main entrance and motor court.

THE RESIDENCE OF WILLIAM FIELD STAUNTON, JR., A. I. A. At Annandale Estates, Pasadena

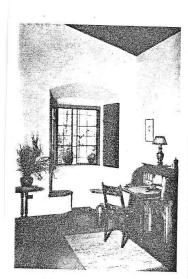

Photographs by Miles Berné

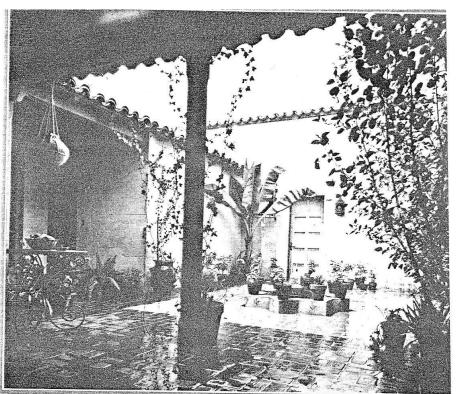

In the home which Mr. Staunton has designed for himself. the most interesting feature is certainly the patio which forms the heart of the house. Brick-paved, bordered by trees and plants, it is ready for manifold uses.

California Arts & Architecture November 1931

(continued...)

Above—a corner of the ground floor study; right—another view of the patio. showing door for direct service of refreshments.

Above—a short flight of steps leads up from living room to patio level, seen through a "picture window." Left—the quaint corner fireplace in the owner's bedroom.

All Applications Must Be Filled Out by Applicant APPLICATION FOR THE ERECTION OF FRAME BUILDING CLASS "D" hereinafter specified. PURPOSE OF BUILDING OWNER'S NAME Owner's Address. Architect's Name 5. CONTRACTOR'S NAME 6. Contractor's Address 7. ENTIRE COST OF PROPOSED BUILDING, 9. Will Building be erected on front or rear of lot? 10. NUMBER OF STORIES IN HEIGHT. Height to highest point of roof... 11. Of what material will FOUNDATION and cellar walls be built? 12. GIVE depth of FOUNDATION below surface of ground 13. Give dimensions of FOUNDATION and cellar wall FOOTINGS 14. GIVE width of FOUNDATION and cellar wall at top_ 15. NUMBER and KIND of chimneys... 16. Number of inlets to each flue... Interior size of flue Give sizes of following materials: MUDSILIS EXTERIOR STUDS 17 2000 Ceiling joist. SECOND FLOOR JOIST ... Material for floors 18. Specify material of roofing. THE FIGURES ON THIS CHART SHOW YOUR SET BACK LINES. who building or portion thereof other structure above the message of the lot upon which is sected shall be built nearer, to it is sected shall be built nearer, to it is sected shall be built nearer, to it is sected shall be built nearer, to the street in which is served to the building line hereby, which is street to the building line bright shall not be deamed a violation before Building lines are burdled to the section of according three gratile beight shall not be deamed a violation hereof. Building lines are burdled to the section of th In Zones C. D and E, or Third, Second and First Residence Districts, respectively, no buildings or structures other than fences not exceeding eight (8) fest in height, shall be constructed nearer than four (4) fest to the side line of any lot within one hundred (199) fest of the street to which such side line runs. As used herein, the term "side line" shall mean all boundaries of any lot axespt the street froatage thereof and the rear line thereof. In the case of lots, the rear lines of which shut on the ride lines of any other lot, such rear line shall also be considered a side line for the purpose of this section. HOUSE There must be a clear air space of at least twelve inches under the first floor joint of all buildings. (State Housing Law of California.) 12-7-7

464 NORTH JUNE STREET

LOS ANGELES

Original Style: Italian Revival (altered)

Year of Completion: 1928

Original Building Permit: #9522, issued by the City of Los Angeles on April 2, 1928 for a two-story, twelve-room residence and garage. The house, to measure approximately 46 by 126 feet with a maximum height of 26 feet, would have a concrete foundation, wood-frame walls covered in plaster, a tiled roof, and a brick chimney.

A copy of this permit is attached on pages 17 and 18.

Cost to Build: \$20,000—a larger-than-average cost for a new house at the time.

Designer and Builder: Chisholm, Fortine & Meikle, Los Angeles. Additional information on this talented but short-lived firm is attached on pages 6 through 10.

First Owner: Marvel W. Chessman, who shared the house with her husband Frank N. Chessman, a physician, their daughter, and a live-in maid. Mrs. Chessman had purchased the vacant parcel from Archibald W. Edes.

Mrs. Chessman was born Marvel DeWitt White in Lyons, Kansas on October 20, 1886. Her father was a fireman. After attending St. Mary's boarding school in Knox, Illinois, she lived with a cousin in French Lick, Indiana. She married her husband in Seattle in June 1909. They would have one child: Jane Newhall Chessman (1920-2000).

Dr. Frank Newhall Chessman was born in Helena, Montana on May 5, 1877. His father William was a miner who had participated in the California Gold Rush and relocated to Montana in 1864. Dr. Chessman attended St. Paul's School in Concord, New Hampshire and graduated from Harvard in 1900. He earned his M.D. degree from the College of Physicians and Surgeons in New York City in 1904, specializing in gynecology and obstetrics. He first worked at that city's St. Luke's Hospital, leaving to become associated with the Sloane Hospital for Women in 1907. By 1913 he had established a private practice in Seattle. Around 1925, he and his family moved to Los Angeles where Dr. Chessman was appointed to the governing committee of the Gorgas Memorial Institute, an organization dedicated to prolonging life and preventing illness.

Dr. and Mrs. Chessman had parted company by 1933. Dr. Chessman and his daughter went to live with his sister elsewhere in Los Angeles while his ex-wife remained at the June Street house. In 1934, she announced her engagement to Marshall Rusk (1882-1963), a well-known singer and voice teacher who had trained and worked in Paris for the past thirteen years. He moved into the house and set up a vocal studio there. Name on the property's title changed to Marvel W. Rusk in 1935.

Evidently the Rusk marriage did not last very long. Later in 1935, the June Street house was sold, and by 1940 Mr. and Mrs. Rusk were no longer living together. At some point thereafter, known once again as Marvel Chessman, she moved to New York City where she died at the age of 90 on April 20, 1977. She was interred at Forest Lawn in Glendale. Dr. Chessman had passed away on January 18, 1971 at the age of 93 and was interred in Helena. Biographical materials on Dr. and Mrs. Chessman and Mr. Rusk are attached on pages 11 through 13.

Other Building Permits: A permit was issued in October 1957 for a 14-by-32-foot addition to a lanai. The owner was to act as his own contractor for this job, valued at \$1,200.

In June 1965, permission was given to build a 684-square-foot gunite swimming pool at a cost of \$4,200. R. B. Perry & Associates was the contractor.

A new 4-by-16-foot passageway was to be built and an existing patio porch converted into a family room, according to a permit issued in January 1968. The cost was estimated at \$7,500. The H & P Construction Company was the contractor.

In May 1971, an existing bathroom was to be remodeled for \$1,200. No structural changes were to be made. H & P Construction was again the contractor.

A new air-conditioning system was installed in July 1972.

H & P Construction was called back in June 1973 to remodel another existing bathroom at a cost of \$1,800.

Copies of these permits are attached on pages 19 through 26.

(Note: Permits for very minor alterations, such as water heater replacement, are not included. Also not included are permits missing from the file or whose microfilmed or digital copies are indecipherable and not otherwise recorded or described in Assessor's records.)

Assessor's Records: The Los Angeles County Assessor first visited the property on October 22, 1928 and recorded a two-story residence with a concrete foundation, stucco walls, a hipped and gabled tile roof, and plaster and tile trim. Heat was provided by two fireplaces and an electrically-controlled gas furnace with ten openings. There were eighteen (later upgraded to nineteen) "good"-quality plumbing fixtures. Lighting fixtures were rated "special." Interior finishes consisted of plaster, Sanitas wall coverings, and plain woodwork. The house had a total of nine hardwood floors.

The Assessor estimated the square footage at 4,654. On the first floor were an entry hall with a tile floor, four living rooms (one was probably a dining room), two bedrooms, one bathroom, a pass pantry, a kitchen, and a breakfast room. The second floor contained three bedrooms and three bathrooms, one with a walk-in tiled shower. There was also a plastered basement that measured approximately sixteen by twenty feet. The attached garage, measuring approximately twenty by thirty feet, had a cement floor, stucco walls, a tiled gabled roof, and a plastered interior.

The Assessor added an 18-by-38-foot swimming pool in 1965. It included a filter and a heater.

The Assessor later recorded a 474-square-foot L-shaped addition to the side of the house. It had a shed-like tile roof and steel sash. The interior contained tongue-in-groove detailing, exposed rafters, one wall paneled in ash, an 18-foot sliding glass door, a parquet floor, and a bar sink.

The Los Angeles County Assessor currently estimates the square footage of the house at 5,128 with five bedrooms and four bathrooms.

Copies of the Assessor's building records are attached on pages 27 through 30.

Other Owners and Residents: In July 1935, Edmond Gage Soule, a horse-breeder from New York, became the owner. In 1953, Gladys Soule was recorded as the executor-owner.

Richard F. McWhorter gained title in April 1956. Mr. McWhorter was a production manager at Universal Studios. Loreine McWhorter joined her husband as co-owner in 1957. She was active in the National Charity League.

In June 1960, Robert C. and Elizabeth F. Hill gained possession.

Title was transferred to Karen L.Van Sant in June 1989.

Robert F. Hill became a co-trustee owner in July 1991.

Dante Di Loreto has been the owner since March 2013.

Notes: On July 28, 1935 the *Los Angeles Times* reported that Mrs. Marvel Rusk had sold the property to E. J. Soule. A photograph accompanying the article (attached on page 14) shows how the original front door has been altered. At some unknown date, a French style canopy was placed over the entry porch, obscuring the original cast-stone quoining that had surrounded an arched opening.

The house was advertised for sale in the *Times* in November 1954, described as having "gunite construction" with a "lovely living room and library, spacious bedrooms, excellent-sized dining room, and nice garden." Another ad in June 1955 described the house as having the "finest construction." Copies of both ads can be found on page 15.

Significance: The City of Los Angeles has determined that the Chessman house is a contributor to the Hancock Park Historic Preservation Overlay Zone. The City's recording form is attached on page 16.

CHISHOLM, FORTINE & MEIKLE Designer/Builders

The firm of Chisholm, Fortine & Meikle, although it flourished for a relatively short time, produced a number of fine residences in a variety of European styles in the Hancock Park and Windsor Square areas of Los Angeles. The principal, Alexander David Chisholm, was born in Canada in 1884 and immigrated to the United States in 1919 with his wife Margaret Meikle Chisholm. They settled first in Montana, but by the early 1920s had relocated to Los Angeles and were living at 4311 Beverly Boulevard. From that address around 1923, Mr. Chisholm began operating a building contracting business, known as Chisholm & Meikle, a partnership between himself and his wife's brother Evan (or Eban) Lorenzo Meikle. Mr. Meikle (1890-1959) was also a native of Canada who had emigrated from Nova Scotia around 1916. He lived with Mr. and Mrs. Chisholm for a number of years, eventually moving with them to a new home at 580 North Arden Boulevard.

Around 1925, Mr. Chisholm took on another partner, William Herschul Fortine (1888-1941) who had already found success in the oil industry and also lived in Hancock Park. Chisholm, Fortine & Meikle became well-known for not just their construction activities but also for their ventures in real estate development. At that time, the firm was located at 509 South Western Avenue.

Perhaps due to the onset of the Great Depression, the partnership disbanded around 1930, Mr. Chisholm forming his own construction business known as the A. D. Chisholm Company, Inc., operating from 3981 West 6th Street. Another brother-in-law, John J. Meikle, who had emigrated from Canada in 1924 and had his own house-painting business, served as vice-president and Mrs. Chisholm was secretary of the firm. They appear not to have been involved in real estate. Mr. and Mrs. Chisholm later moved to North Hollywood where Mr.Chisholm died in 1946 at the age of 62 as a result of injuries sustained from being hit by a car as he walked across Magnolia Avenue. A copy of Mr. Chisholm's entry in the 1927/28 edition of *Who's Who in Los Angeles County* is attached.

Mr. Meikle also continued in the construction business until his own death at the age of 68. He had lived on Chisholm Avenue in Van Nuys which had perhaps been named at the time his earlier firm had been involved in real estate development. Mr. Fortine, a native of Illinois, evidently returned to the oil business in California and Mexico. At the time of his death at the age of 53 he was living in Porterville where he was a well-known landowner.

None of the principals of Chisholm, Fortine & Meikle appear to have had architectural training. The fact they took credit for the design of many of the residences they built indicates they probably had experienced architects on their staff. They also on occasion used the architectural services of the well-known firms of Webber, Staunton & Spaulding and Clarence J. Smale. At least eleven of Chisholm, Fortine & Meikle's homes were featured in the *Architectural Digest* between 1925 and 1930. Three documented addresses are: a residence at 543 Muirfield Road in the Italian style that the firm built on speculation; the White residence at 366 South June Street;

the Chessman residence at 464 North June Street; and the Ridgway residence at 355 Rimpau Boulevard. Both of the latter houses were done in the French Revival style.

HEART ILLS END LIFE OF F.F.FORTINE

Unexpected Attack at His Home Terminates Career of Veteran Oil Man

An unexpected heart attack closed the career yesterday of Fred A. Fortine, 52-year-old vice-president and

FRED A.

manager of operations for the Barnsdall Oil Company, Death occurred at his home, 136 South Lucerne Boulevard. Funeral services will be conducted at 3 p.m. tomorrow at Pierce Brothmortuary, ers with interment in Forest Lawn Memorial Park. Besides h i s

Besides h i s widow, M r s. Lina Langstaff

Fortine, Mr. Fortine leaves his brother, William H. Fortine of the oil industry; five sisters, Emma Bergren of Alberhill, Mrs. E. H. Smith of Riverside, Mrs. C.-E. Wayne of Fillmore, Mrs. C. S. Hirt and Mrs. Dora Dresser of Oxnard, and three sons. Wayne and Douglas are connected with Barnsdall, and Dwight is with the Shell Oil Company in Venezuela.

Mr. Fortine was born in Kanka-kee, Ill., in 1879. While still a young man, and shortly after his arrival in California, he obtained employment in the old Kern River oil fields near Bakersfield, and there worked up through the various branches of the industry. After gaining wide experience and a thorough knowledge of the oil industry, Mr. Fortine joined the K.T.O. Oil Company, a subsidiary of the Southern Pacific. He later joined the Republic Petroleum Company.

Evan L. Meikle

Funeral services for Evan L. Meikle, 68, building contractor, will be conducted by Pierce Bros. Van Nuys Mortuary today at noon in the Church of the Recessional, followed by interment Forest Lawn Memorial-Park. Born in Canada, Mr. Meikle had been a California resident for 36 years. He lived at 6932 Chisholm Ave., Van Nuys, and died in Hospital on Thursday. Meikle leaves his Evelyn Mrs. Meikle: daughter, Margaret: John; two sisters, Margaret Chisholm and Mrs. William Milligan, and two brothers, John J. and W. Carr Meikle.
